PARADEA — Bifacial Glass-Glass module

HIGH EFFICIENCY BI-FACIAL GLASS-GLASS PV MODULES

Paradea, the Bifacial Glass-Glass multi busbar PV modules are made with utmost precision to ensure LCOE cutback along with less BOS cost improving value proposition of the modules along with up to 25% bifacial gain and additional power yield with 30 years of performance lifetime and 0.5% annual degradation.

Paradea up to 610W

Paradea up to 565W

Paradea up to 465W

Paradea up to 420W

Paradea up to 605W

Paradea up to 555W

HYPER SOL – N-TYPE cell module

HIGH EFFICIENCY N-TYPE PV MODULES

Hypersol is our latest N-TYPE cell module available in bifacial format with 108, 132 & 144 cells, with aluminium frame.

Introduced Hypersol Pro featuring integrated blocking diode technology for enhanced reliability and zero reverse power loss.

Hypersol up to 605W

Hypersol up to 440W

Hypersol up to 725W

Hypersol up to 640W

Hypersol Pro up to 640W

Hypersol up to 475W

* Vikram Solar supplied modules only

We strive to pioneer innovative adoption of solar energy solutions and were the first in launching several solar projects in India, as illustrated below:

Designed and installed the world's first **fully solarized airport** in Kochi, Kerala of 100 kW capacity

To feature in the KIWA Photo-Voltaic Evolution Labs (PVEL) **module reliability scorecard** in 2017 and for the 7th consecutive time since 2019

To be listed as one of the first few players to introduce **half-cut cell module** technology in India as per ALMM notified by MNRE in March 2021

To receive **EcoVadis 'Platinum' Badge** in the sector at the group level

Company in India to commission a **floating solar PV plant** of 10 kW

Indian solar company to feature in the **Bloomberg NEF Tier 1** list in 2014

ACCREDITATION & AUDIT

Customized Hail Ready Modules

Offers enhanced protection for installations of solar PV modules in harsh climates
